

INSTANT FEEDBACK VIDEO

Instant Feedback – View and record your performance instantly

We believe practice make perfect, however during practice we always have to rely on our coach to observe and give direct feedback, as we can't see ourselves in action during training to improve our performance.

Instant Feedback is a software designed to record and replay instantly to give direct feedback for the user with multiple cameras. With Instant Feedback, user can quickly record their movement and review instantly without the need of others.

★ Benefits

- ▶ **Multiple recording and replay**
The software is able to record and replay automatically during the user's training without extra control .
- ▶ **Various angles**
Multiple cameras can be integrated to capture user's performance at different angle.
- ▶ **Plug & Play**
It is easy to use and can work instantly with the readily available camera.
- ▶ **Automatic saving**
The software can save all the video automatically as many times as user want.

✓ Features

- ▶ **Customizable**
All the recording and replay setting can be customized including repetition, duration and delay.
- ▶ **Camera synchronization**
Different types of camera can be used including webcam, USB camera and even some high-speed camera.
- ▶ **Portable**
It can be used anywhere, as it is installed on a laptop and can be used with normal USB camera.

⚙ Applications

- ▶ **Suitable for any sports**
This software can be used in various activity training such as yoga, golfing, bowling, basketball, gymnastics, running, swimming, squash and etc.
